Supplementary Figure S2. Regional distribution of RadNet monitors and nearby power plants

Solid circles indicate 20−km monitor−centered buffers; dashed circles indicate 50−km buffers.
Black triangles represent RadNet monitors; grey points represent unique nearby power plants. Regional divisions are descriptive and are not statistical analysis strata.

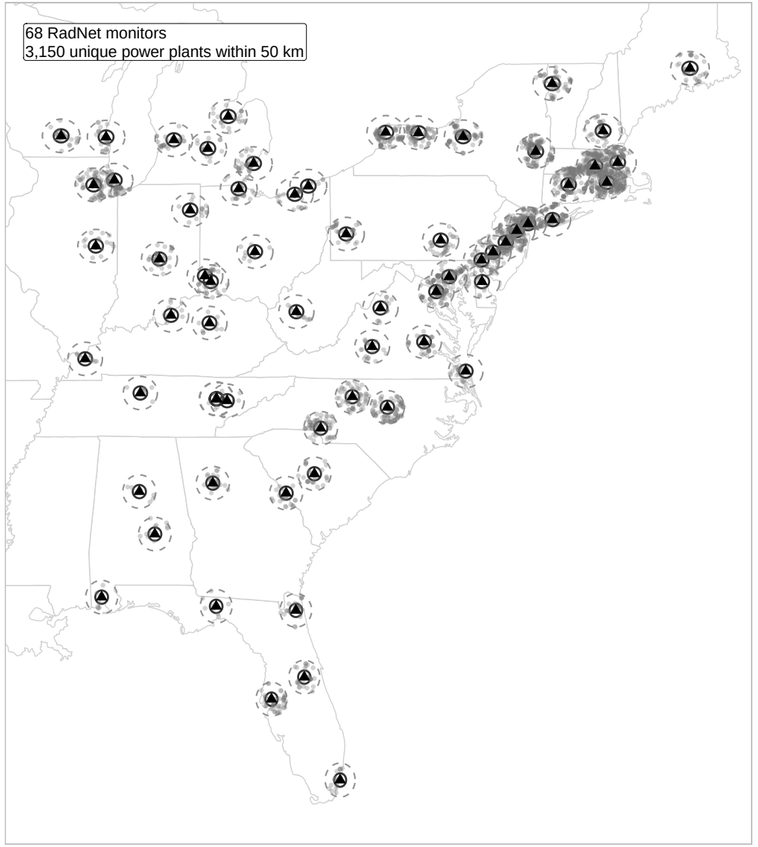

A. Western CONUS

B. Central CONUS

C. Eastern CONUS

Regional plant counts represent unique power plants located within 50 km of at least one RadNet monitor shown in that panel. A plant may contribute to more than one descriptive panel if it lies within 50 km of monitors on opposite sides of a regional boundary.
